Title (description) Release A PDPS DAAC Testbed Reconfiguration									
Documents Affected						Source Nos (RID, NCR, etc.) or Tech Reference			
RTM Change <input type="checkbox"/> Start New Baseline <input type="checkbox"/>									
Problem There is an urgent need of two HP/UX machines for EP7 support (Jack Eisenstein).									
Proposed Solution Swap two HP/UX machines (sparrow and oriole) for two SPARC/Solaris machines (ariel and yakko). Since sparrow is currently being used as the AutoSys Event Server, Release A PDPS will require 1) memory upgrade on osprey to 128MB, 2) full SYBASE DBMS installation on osprey and hatteras, 3) AutoSys client installation on ariel and yakko, and 4) oodce/dce configuration on osprey and hatteras. Memory upgrade on osprey is necessary in order to support both AutoSys Event Server and Event Processor as well as data processing jobs associated with the science software (PGE).
